PROJECTS & CONTRIBUTIONS

Portfolio | GitHub   Web Application

- Language: HTML5, CSS3, JavaScript.
- Framework: React

Personal Project | *2048 Game* GitHub   Web Application

- Inspired by the game 2048 and other pixel-graphics games, this project primarily uses React to develop a 2048 webgame with a pixelated design.
- Language: HTML5, CSS3, JavaScript.
- Framework: React

Personal Project | *WeCheck* GitHub   Mobile Application

- An application for weather forecasting within following 7 days across multiple platforms (Android, IOS)
- Used free rest API to generate weather forecasting at standing coordination; and using SQLite to manage the location and its forecast data searched by users.
- Language: C#.
- Framework: ASP.NET.
